

D-VISION® Data Integration Suite

The latest in DATA MINING Technology allows you full access to all information generated in your business both real-time and archived.

How Does It Work

D-Vision integrates with Point of Sale, Electronic Betting, Payroll Systems, Traffic Management Systems, Surveillance Equipment & Other Electronic Devices and Security Systems to compile Data according to custom programmable filter parameters.

D-Vision® Server

The server application runs as a Windows service and interacts with the licensed devices. D-Vision correlates all disparate data into a central SQL database via secure transports, options exist for redundant databases to ensure data integrity and availability.

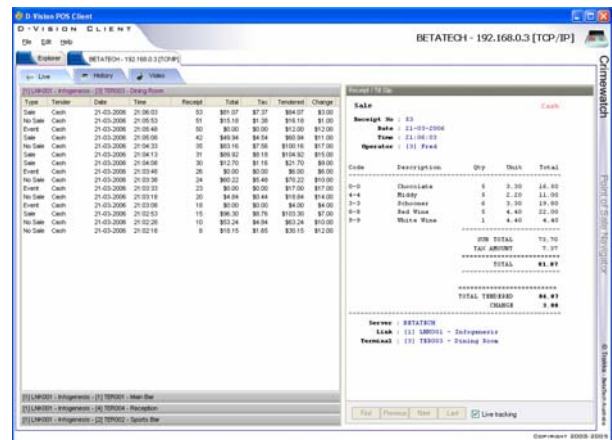

Trakka® Client Software

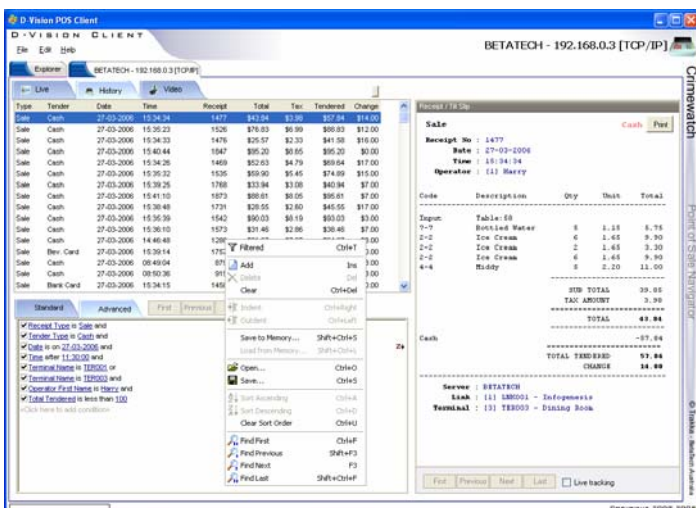

The client software runs as a Windows application, on start-up a client is registered to a server or multiple servers simultaneously presenting operators with synchronised data from all connected servers. The Trakka client has data mining tools that enable users to mine the database with specific search criteria and link this to actual video footage of a transaction or an event.

- ✓ Now you can monitor your operation from your office or remotely
- ✓ Resolve disputes
- ✓ Track Marketing and Product performance
- ✓ Monitor staff activities
- ✓ Monitor service levels and performance
- ✓ Get notified of significant events via SMS or e-mail client
- ✓ Identify fraud and sweet hearting

Sample Graph

DATA MINING Flexibility

The power of D-Vision® is the total customisation of filters, these can be saved, recalled or modified by any authorised users as and when required.

Queries can be customized to venues, time / date and sub-systems.

Queries and filters are setup with the advanced query function and are in simple to understand phrases.

Typical Applications

Clubs, Casinos, Traffic Management, Building Management & Monitoring, Cash Centers, Bank ATM's, Postal Services, Airports, Visitor Management, Restaurants, Bars or any application where cash or electronic transactions occur.

Custom applications as per clients' requirements include multi-vendor system integration, Lighting & AHU Control, Baggage & Parcel Tracking, Self Service Terminal Monitoring & other specialized services.

Technical Specifications

Hardware requirements for the PC on which the D-Vision Server is to be installed are as follows:

Hardware	Recommended
Processor	Pentium 4 2.40 GHz or better
RAM	512 Mbyte or more
Hard Disk	50 GB or more
Display	1024 X 768 or better
Mouse	Required
CD ROM	Yes
Network Adaptor	Yes

Software Requirements

The server and client PC's must be preloaded with Windows. This may be Windows 2000 or Windows XP. For systems with more than 1 Trakka client software, operating via a network, the PC's must have networking software for TCP/IP installed.

Specialized Interfaces

- DirectX DVR
- ADO
- .Net
- OPC
- SQL
- XML

Typical Device List

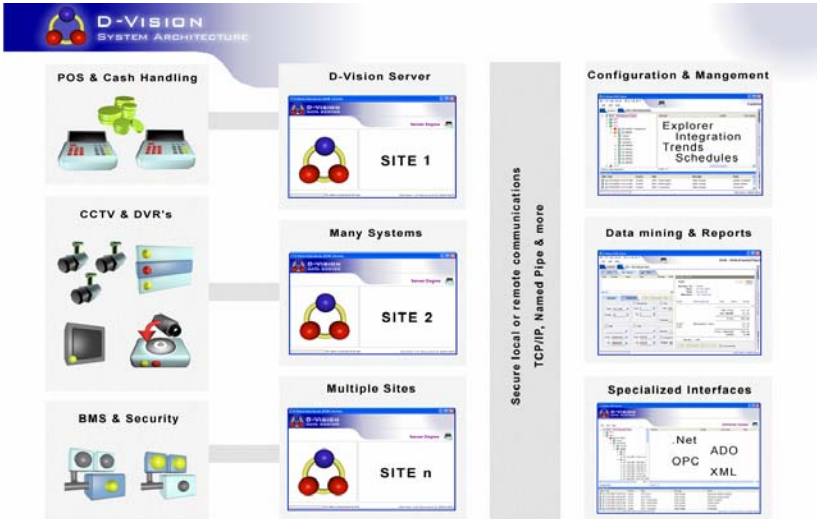

- Micros Fidelio
- Infogenesis
- StarrServer
- Sanyo
- Quest
- Geuterbruck
- Dallmeier

- Honeywell Fusion
- GE Interlogix / Kalatel
- March Networks
- EBet

- Traffic Management Systems
- Ticketing Systems
- Andover TAC
- Modbus
- Betatech VideoBloX
- Panasonic Keyboards
- Pelco Keyboards
- Note sorters, scales, coin counters, scanners and bar code readers
- Many generic registers and data entry terminals
